

VNG 753

Setting tool for folding blind rivet nuts
Pneumatic-hydraulic | stroke-controlled

The special **HONSEL** tool for folding rivet nuts.

These can be set quickly and easily thanks to their **very long stroke** of up to 15 mm and correspondingly **extended mandrels**.

Folding blind rivet nuts are used wherever delicate parts have to be joined and the riveting forces have to be distributed gently over the large folded setting head in order to protect the material.

Family facts on the **HONSEL** pneumatic tools on page 65.
